Bending Health Toward Justice

A Note from Our Director

Dear friends,

In this period of uncertainty and change, we at ARC are more determined than ever to support accessible care and just health for all. We recognize the continued urgency of our work especially as political landscapes shift.

In this spirit, we share November's ARC news as well as **our new account on Bluesky**, where you can follow us for more frequent updates, news, and announcements.

We're also pleased to invite you to join the **UCSF Benioff Homelessness & Housing Initiative for a special webinar** tomorrow, **Wednesday December 11, at noon Pacific Time**, where we will examine the impacts of this election on policy, discuss the challenge of delivering evidence-based services in a changing environment, and explore paths forward for advancing effective homelessness solutions. Find more information and a registration link below. We hope to see you there.

Wishing you a renewing and hopeful holiday season,

Margot Kushel, MD
Director, ARC for Health Equity

ARC ACHIEVEMENTS

Alicia Fernández Earns 2024 Chancellor Award for Martin Luther King, Jr. Leadership

UCSF Chancellors recognized ARC Executive Committee Member and Core Faculty and founder of the UCSF Latinx Center of Excellence, **Alicia Fernandez, MD**, for her ongoing leadership in improving access to health care and diversifying the medical profession through training and mentoring Latinx learners.

During the COVID-19 pandemic, Dr. Fernandez led efforts to provide public education and equitable care access, demonstrating the steadfast concern for popular health that is a hallmark of her work.

“This year’s awardees have all committed their time and effort far beyond their job scope or academic role to build bridges, dismantle barriers, and create spaces of innovation and connection,” announced the **UCSF Office of Diversity and Outreach**. Each year the award recognizes and honors three individuals at UCSF—one faculty, one staff, one student/resident/postdoctoral scholar—who have demonstrated outstanding commitment and service to the ideals of diversity, equity, and inclusion beyond the scope of their job, area of research, or training.

**Watch Dr. Fernandez's Award
Announcement**

Melanie Molina Receives a Harold Amos Medical Faculty Development Program Award

The Robert Wood Johnson Foundation awarded ARC Mentored Faculty, **Melanie Molina, MD, MAS**, a prestigious Harold Amos Medical Faculty Development Program Award (AMFDP) to support her work on emergency

department tools to address patient's social risks. The AMFDP recognizes only 10 scholars annually and offers four-year postdoctoral research awards to faculty from historically marginalized backgrounds who are committed to academic careers in academic medicine.

Dr. Molina is an Assistant Professor of Emergency Medicine at UCSF and works clinically as an emergency physician at Zuckerberg San Francisco General Hospital and UCSF Medical Center. Dr. Molina's work and commitment to mitigate disparities in health care access, improve comprehensive emergency care for historically marginalized populations, and to create a safe and equitable environment in the field of emergency medicine, are more necessary now than ever. Congratulations Dr. Molina!

Maria Chao Appointed Director of Research at UCSF's Osher Center for Integrative Health

Congratulations to ARC Associated Faculty member, **Maria Chao, DrPH, MPA**, as she assumes the role of Director of Research at the UCSF Osher Center for Integrative Health and Osher Foundation Endowed Chair in Research in Integrative Health! Read more about Dr. Chao's appointment [here](#).

MEDIA HIGHLIGHTS

Maya Vijayaraghavan, MD, MAS, recommended people trying to quit smoking tobacco try FDA-approved aids rather than shift to e-cigarettes as a cessation aid (*AAMC News*).

Margot Kushel, MD, remarks on the costs of leaving unhoused people behind as a rare disease poses a danger to people experiencing homelessness (*Washington Post*). She also noted that city-sanctioned homeless camps tend to be ineffective (*San Francisco Chronicle*). Margot attributed the high costs of addressing homelessness to decades of underfunding (*Los Angeles Times*) and lamented the high costs of jailing those who sleep on the street, compared to providing housing (*Los Angeles Times*).

Eleanor Bimla Schwarz, MD, MS emphasized that hormonal IUDs reduce the risk of endometrial cancer and only slightly increase the risk of being diagnosed with breast cancer (*CNN*).

Leslie Suen, MD, MAS, explained that despite methadone's proven efficacy and safety for OUD, it remains vastly underutilized due to outdated US policies restricting its use to opioid treatment programs (*MedScape*).

ARC Affiliated member **Dhruv Kazi, MD, MS**, noted that since more than half of U.S. adults who have taken GLP-1 receptor agonists found the therapy was difficult to afford, interventions to reduce economic barriers to access are urgently needed

ARC OPPORTUNITIES & EVENTS

BHHI WEBINAR

The results of the 2024 election could bring shifts in homelessness policy and funding on the West Coast and beyond. What do these changes mean for the future of homelessness solutions?

We invite you to join the UCSF

Benioff Homelessness & Housing Initiative for a special **webinar** where leading experts will examine the impacts of this election on policy, discuss the challenge of delivering evidence-based services in a changing environment, and explore paths forward for advancing effective homelessness solutions.

Wednesday, December 11, 2024

12 - 1 PM PST

Virtual (Zoom)

Speakers include:

- **Margot Kushel, MD** – Director, Benioff Homelessness & Housing Initiative
- **Marc Dones** – Policy Director, Benioff Homelessness & Housing Initiative
- **Ann Oliva** – CEO, National Alliance to End Homelessness
- **Chione Lucina Muñoz Flegal, MCP** – Executive Director, Housing California

Partnerships for Research in Implementation Science for Equity in Heart and Lung Diseases (PRISE-HL) T32 Program

PRISE Center

University of California
San Francisco

In March 2023, the **PRISE Center** was awarded a T32 grant from The National Heart, Lung, and Blood Institute (NHLBI). The goal of the Partnerships for Research in Implementation Science for Equity in Heart and Lung Diseases (PRISE-HL) T32 program is to provide support to outstanding post-doctoral scholars with interdisciplinary training in implementation science and health equity approaches to help transform the

uptake and delivery of evidence-based interventions for heart and lung diseases in clinical and community settings.

One-year training slots are available on a competitive basis to four qualifying trainees proposing implementation science research in NHLBI priority areas (heart, lung, blood, and sleep disorders), with a focus on health disparities.
